

Vision Document

Project Name

GymDesk – Small Gym Management System

1. Vision Statement

GymDesk aims to provide a simple, efficient, and user-friendly web-based management system for small and medium-sized gyms. The system will streamline daily gym operations by managing memberships, attendance, payments, classes, and staff activities in a centralized platform accessible from any device.

The vision is to replace manual processes and spreadsheets with an integrated digital solution that improves operational efficiency, enhances member experience, and supports business growth.

2. Problem Statement

Many small gyms still rely on manual records, paper-based attendance tracking, and disconnected tools for managing memberships and payments. These methods often lead to:

- Inaccurate attendance records
- Difficulty tracking membership expirations
- Missed payment collections
- Inefficient communication with members
- Limited visibility into gym performance and revenue

GymDesk addresses these challenges by providing a centralized management platform that automates key operational tasks and provides real-time insights.

3. Product Overview

GymDesk is a responsive web application that enables gym owners and staff to manage members, subscriptions, attendance, payments, trainers, classes, and reports through a secure role-based system.

The platform supports both Arabic and English languages and can be accessed through desktop and mobile web browsers without requiring a dedicated mobile application.

4. Project Objectives

The primary objectives of GymDesk are:

- Simplify gym administration processes
 - Improve attendance tracking accuracy
 - Automate membership and payment management
 - Provide timely notifications and reminders
 - Support trainer and class scheduling
 - Generate useful operational and financial reports
 - Enhance member engagement and satisfaction
-

5. Target Users

Guest

Potential customers who want to explore gym services and pricing.

Gym Members

Registered members who need access to subscription information, attendance records, and notifications.

Reception Staff

Employees responsible for member registration, payments, and check-ins.

Trainers

Fitness trainers responsible for managing classes and attendance.

Gym Managers

Personnel responsible for monitoring gym operations and staff activities.

Gym Owners

Business owners who require complete access to analytics, reports, and system configuration.

6. Key Features

Member Management

- Member registration and profile management
- Search and filtering capabilities

- Membership status tracking

Subscription Management

- Multiple subscription plans
- Membership renewals
- Expiration tracking

Attendance Tracking

- QR Code check-in
- Member ID check-in
- Attendance history

Payment Management

- Payment recording
- Revenue tracking
- Overdue payment monitoring

Trainer and Class Management

- Class scheduling
- Trainer assignment
- Attendance monitoring

Reporting and Analytics

- Revenue reports
- Attendance reports
- Membership statistics
- Business performance dashboards

Notifications

- Subscription expiration reminders
- Payment due reminders
- Membership renewal alerts

7. Business Benefits

GymDesk provides several benefits to gym operators:

- Reduced administrative workload
- Improved operational efficiency
- Better financial tracking
- Increased membership retention

- Enhanced customer experience
 - Data-driven decision making
 - Centralized access to gym information
-

8. Success Criteria

The project will be considered successful if it achieves the following:

- Accurate tracking of member attendance
 - Reduction in missed membership renewals
 - Efficient management of payments and subscriptions
 - Improved visibility into gym performance
 - Positive user experience for staff and members
 - Reliable generation of operational and financial reports
-

9. Scope Summary

GymDesk will provide a complete web-based solution for managing gym operations, including member management, subscriptions, attendance tracking, payments, trainer scheduling, notifications, and reporting, while supporting multiple user roles through a secure role-based access control system.
